Barracuda Spam & Virus Firewall
Industry leading spam and virus protection

The Barracuda Spam & Virus Firewall is an integrated hardware and software solution designed to protect your email server from spam, virus, spoofing, phishing, and spyware attacks. The Barracuda Spam & Virus Firewall is compatible with all email servers and can fit into nearly any corporate or small business environment. With no per user license fees, the Barracuda Spam & Virus Firewall offers the most affordable spam and virus protection available.
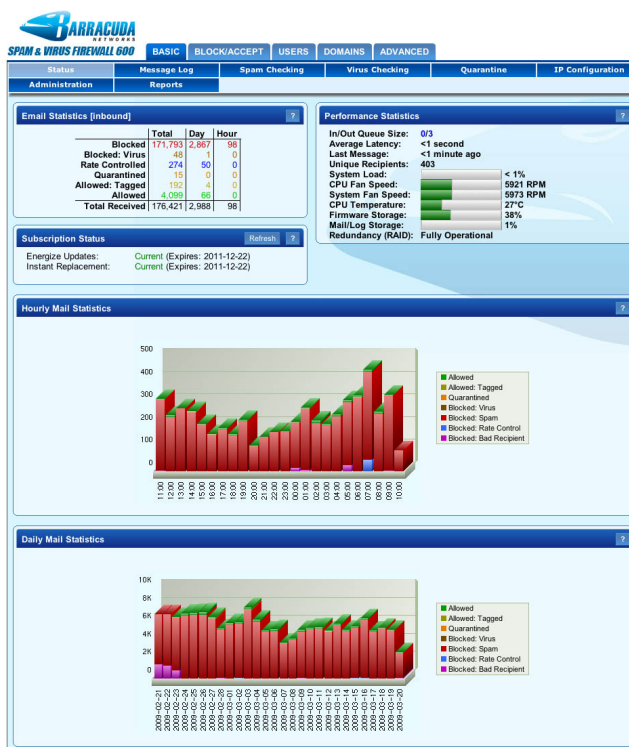

Flexible, Comprehensive Protection
The Barracuda Spam & Virus Firewall is available in eight models to handle a wide range of needs for small and medium businesses, as well as large enterprises, including Internet Service Providers and hosting providers. Multiple Barracuda Spam & Virus Firewalls can be clustered for greater capacity and higher availability. All Barracuda Spam & Virus Firewall models incorporate essential outbound filtering techniques, including attachment scanning, virus filtering, rate controls, and encryption. These features help organizations to ensure that all outgoing email is legitimate and virus-free.
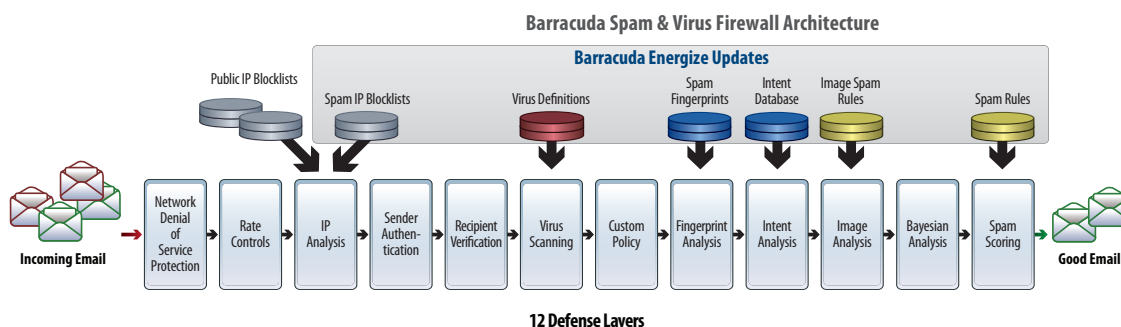

The Barracuda Spam & Virus Firewall's layered approach minimizes the processing of each email, which yields the performance required to process millions of messages per day. Unlike software solutions, the Barracuda Spam & Virus Firewall reduces the load placed on the email server by offloading both spam and virus filtering. Its architecture leverages 12 comprehensive defense layers to provide industry-leading defense capabilities.

The Barracuda Spam & Virus Firewall filters all email messages and displays the number of emails received with statistics on how they were processed.

Easy-to-Use and Maintain
The Barracuda Spam & Virus Firewall is easy to set up with no software to install or network modifications required – minimizing ongoing administration. Energize Updates are delivered automatically by Barracuda Central, an advanced technology center where engineers work relentlessly to provide the latest spam definitions, virus definitions, and security updates which are distributed hourly for continuous protection against the latest threats.

TECHNICAL SPECIFICATIONS

Security Features

COMPREHENSIVE PROTECTION
- Spam and virus filtering
- Prevents spoofing, phishing and malware
- Denial of Service protection
- Directory harvest protection
- Outbound email filtering

SPAM FILTER
- Rate control
- IP Reputation Analysis
- Fingerprint and Image Analysis
- Rules-based scoring algorithms
- Bayesian algorithms

SENDER AUTHENTICATION
- SPF and DomainKeys
- Emailreg.org
- Invalid bounce suppression

ADVANCED POLICY CONTROLS
- IP and content-based filtering
- Sender/recipient filtering
- RBL and DNSBL support
- Keyword blocking
- Character set blocking
- Reverse DNS blocking

- URL pattern and category blocking
- TLS encryption policy

VIRUS FILTER
- Triple-layer virus blocking
- Barracuda Real-Time Protection
- Decompression of archives
- File type blocking

System Features

ADMINISTRATORS
- Web-based interface
- User account administration
- Reports, graphs and statistics
- LDAP interface
- Multiple domain support
- Secure remote administration
- Journaling
- Delegated domain administration
- Delegated help desk role

END USERS
- User-based filtering
- Individual spam scoring
- Personal allow and block lists
- End user quarantine and digest emails

- Outlook / Lotus Notes integration
- Bayesian analysis

Hardware Features

CONNECTORS
- Standard VGA
- PS/2 keyboard/mouse
- Ethernet (see chart below)
- Serial port (DB-9)

POWER REQUIREMENTS
- AC input voltage 100-240 volts
- Frequency 50/60 Hz

Support Options

ENERGIZE UPDATES SUBSCRIPTION
- Standard technical support
- Hourly spam definition updates
- Barracuda Reputation databases
- Fingerprint and Intent analysis definitions
- Spam and image spam rules
- Hourly virus definition updates

INSTANT REPLACEMENT SERVICE
- Replacement unit shipped next business day
- 24x7 technical support
